

Advertisement for Senior Diagnostic Physicist

About the Hermitage Medical Clinic

The Hermitage Medical Clinic is a 112 bed private hospital in Lucan, West Dublin. Our specialised medical teams provide medical, surgical and advanced radiotherapy care to patients and are supported by the very latest medical technology. The Hermitage Medical Clinic is committed to providing excellence in patient care using state-of-the-art facilities. The Clinic offers an outstanding level of expertise and cutting edge technology. We have the most advanced diagnostic imaging equipment available today, full Cardiological facilities including a Cardiac Catheterisation Suite and Clinical Laboratory services.

The Role

We are seeking a Senior Diagnostic Physicist to join the Physics team. The role will report to the Lead Diagnostic Physicist. The successful candidate will assist with the scientific and technical support to Nuclear Medicine, Radiopharmacy, Diagnostic imaging and Radiation Protection services in the Hospital.

Specific Duties and Responsibilities

- To provide scientific and technical support to Nuclear Medicine, Radiopharmacy, Diagnostic Imaging and Radiation Protection services in the hospital. Covering a range of diagnostic imaging and nuclear medicine equipment including General Radiography, Dental, Interventional Fluoroscopy, Mammography, CT, SPECT/CT, PET/CT, MRI, Lasers, Ultrasound and Reporting Monitors.
- To provide daily support in Nuclear Medicine and Radiopharmacy, including Quality Assurance and Radiopharmaceutical preparation
- To carry out annual and post service quality control checks on all imaging equipment in the Diagnostic Radiology and Nuclear Medicine department.
- To organise the calibration of all radiation measurement instruments and other ancillary equipment used in the diagnostic radiology and nuclear medicine department.
- To assist in the management of occupational radiation exposure monitoring.
- To carry out radiation protection measurements as required.
- To participate in the specification, evaluation, installation, acceptance and commissioning of new imaging modalities including ionising and non-ionising equipment.
- Contribute, as required, to research, development and innovation.

The Person

Essential requirements:

- Hold a recognised first or second class honours degree in Physics or another appropriate science subject.
- Have satisfactory relevant experience in the field of medical physics
- Strong IT Skills
- Results Driven and Accountable
- Attention to Detail
- Initiative
- Problem Solving and decision making
- Adaptability and Flexibility
- Teamwork
- Interpersonal and communication skills
- Commitment to Quality

Desirable requirements

- Hold an appropriate MSc. or PhD in the area of medical physics

- Registered with the Irish College of Physicists in Medicine or can demonstrate willingness and eligibility to apply for registration.
- Can demonstrate a willingness to apply or have submitted an application for admission to the EPA Register of Radiation Protection Advisors or have evidence of being on the Register
- Experience in the following areas: Diagnostic imaging (ionising and non-ionising), nuclear medicine, radiation protection
